

Hexagonal Shelf

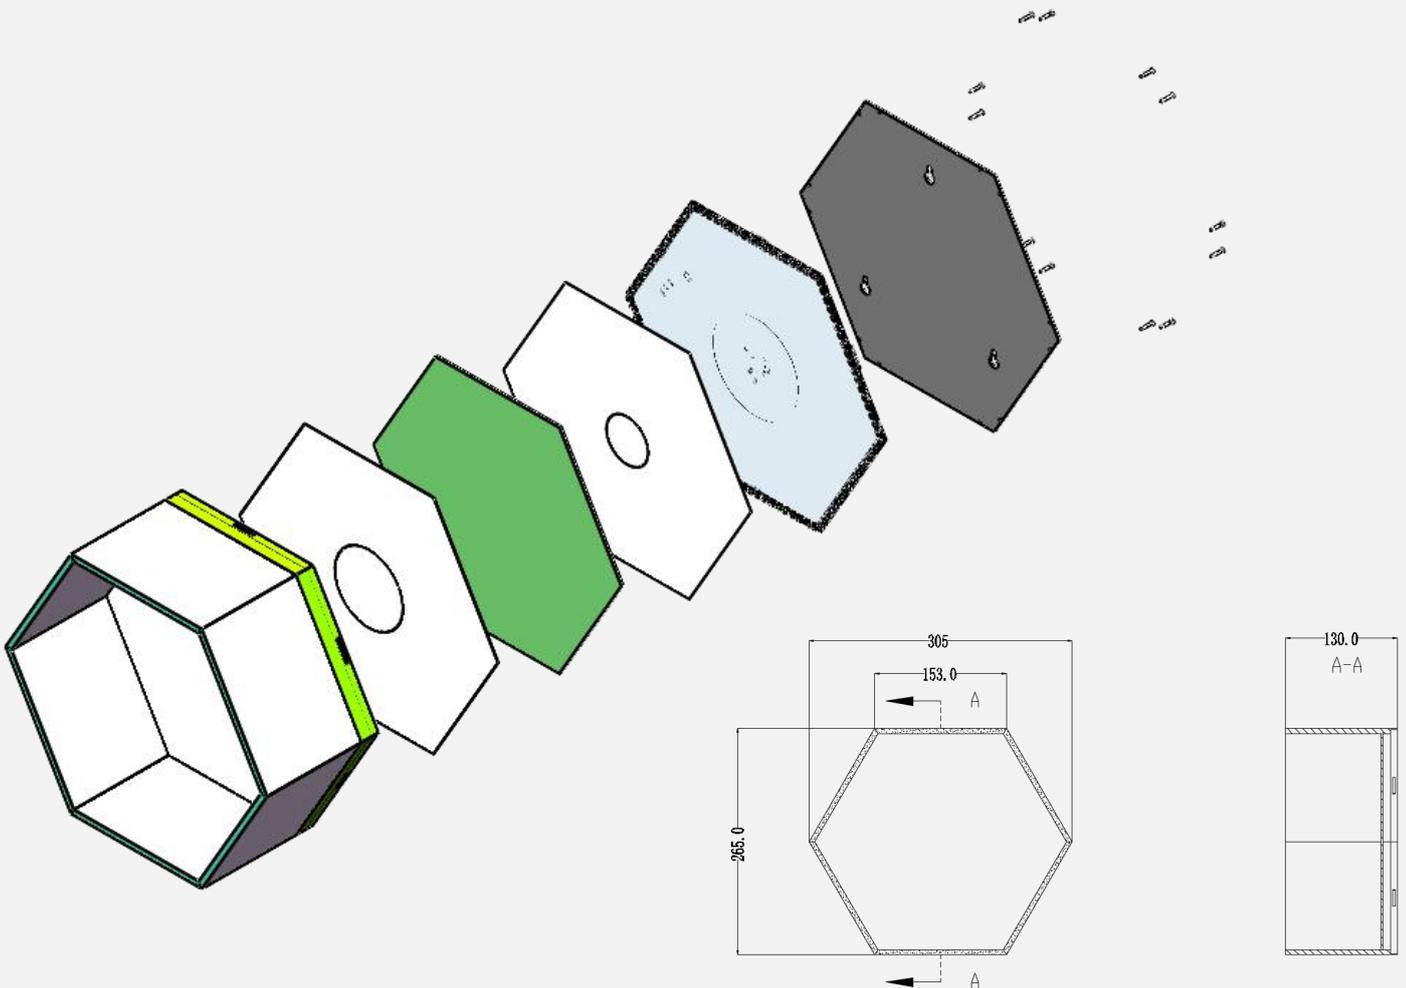

- ◆ The display stand is made from transparent acrylic panels that are joined together, with a hexagonal geometric shape that makes it visually appealing, adding a unique aesthetic to the room.
- ◆ It combines RGB and white LED lights, with RGB lighting along the edges that shifts between three colors to create an ambient effect. The center of the display can hold gift items or decorative objects.
- ◆ Multiple display stands can be connected via terminals to form different patterns.

Product Characteristics

- Made from transparent acrylic through splicing, it is elegant and visually appealing.
- An integrated optoelectronic light panel combines RGB and white light, creating dynamic and static lighting effects to enhance the atmosphere of the space.
- Gifts or decorative items can be placed in the center of the product.
- The display stand can be connected through terminals, allowing multiple units to be spliced together to form different patterns. An aluminum plate is mounted on the back of the stand for easy installation and fixing.
- An aluminum plate is mounted on the back of the stand for easy installation and fixing.

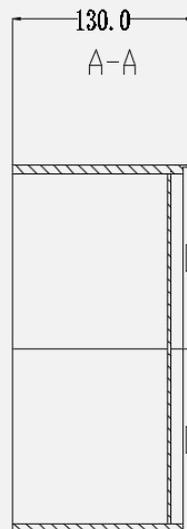

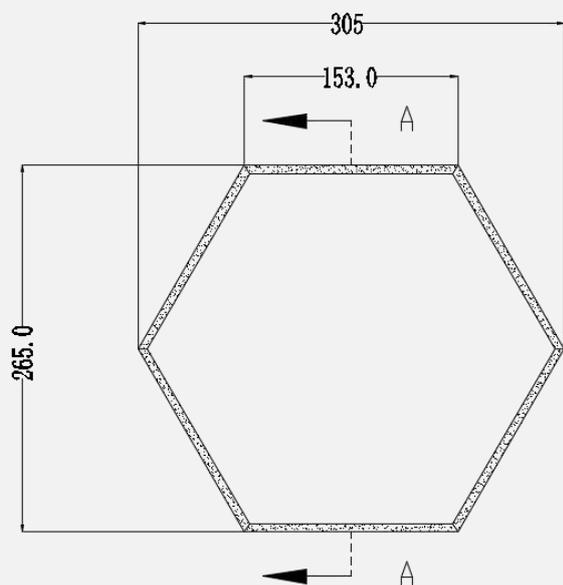

Product Structure

Light Source Parameters

Model	Color Temperature/K	Color Rendering Index(CRI)	Voltage/V	Power/W
RGB-3535LED	RGB	Ra > 80	DC12V	3-5W
3014-Side-emitting	6000-6500	Ra > 80	DC12V	5-8W
